- Customised welcome
- Log out button on bottom
- Actual weapon art from the game for familiarity
- Clickable pictures to follow links

- Search bar
- Scrollable screen
- Button to follow to stats

Logging into the app allows you to customise the welcome message, as this app is targeted towards the dark souls 3 community, all the people who have been as frustrated as myself with minimising during gameplay to check on certain qualities of weapons and for anyone generally looking for a mobile hub of information for the game. The app has the categories of weapons laid out in an orderly fashion for user friendliness and ease of navigation. The weapons have their stats listed next to them and in the stats screen the usage numbers and other comparisons can be made.
